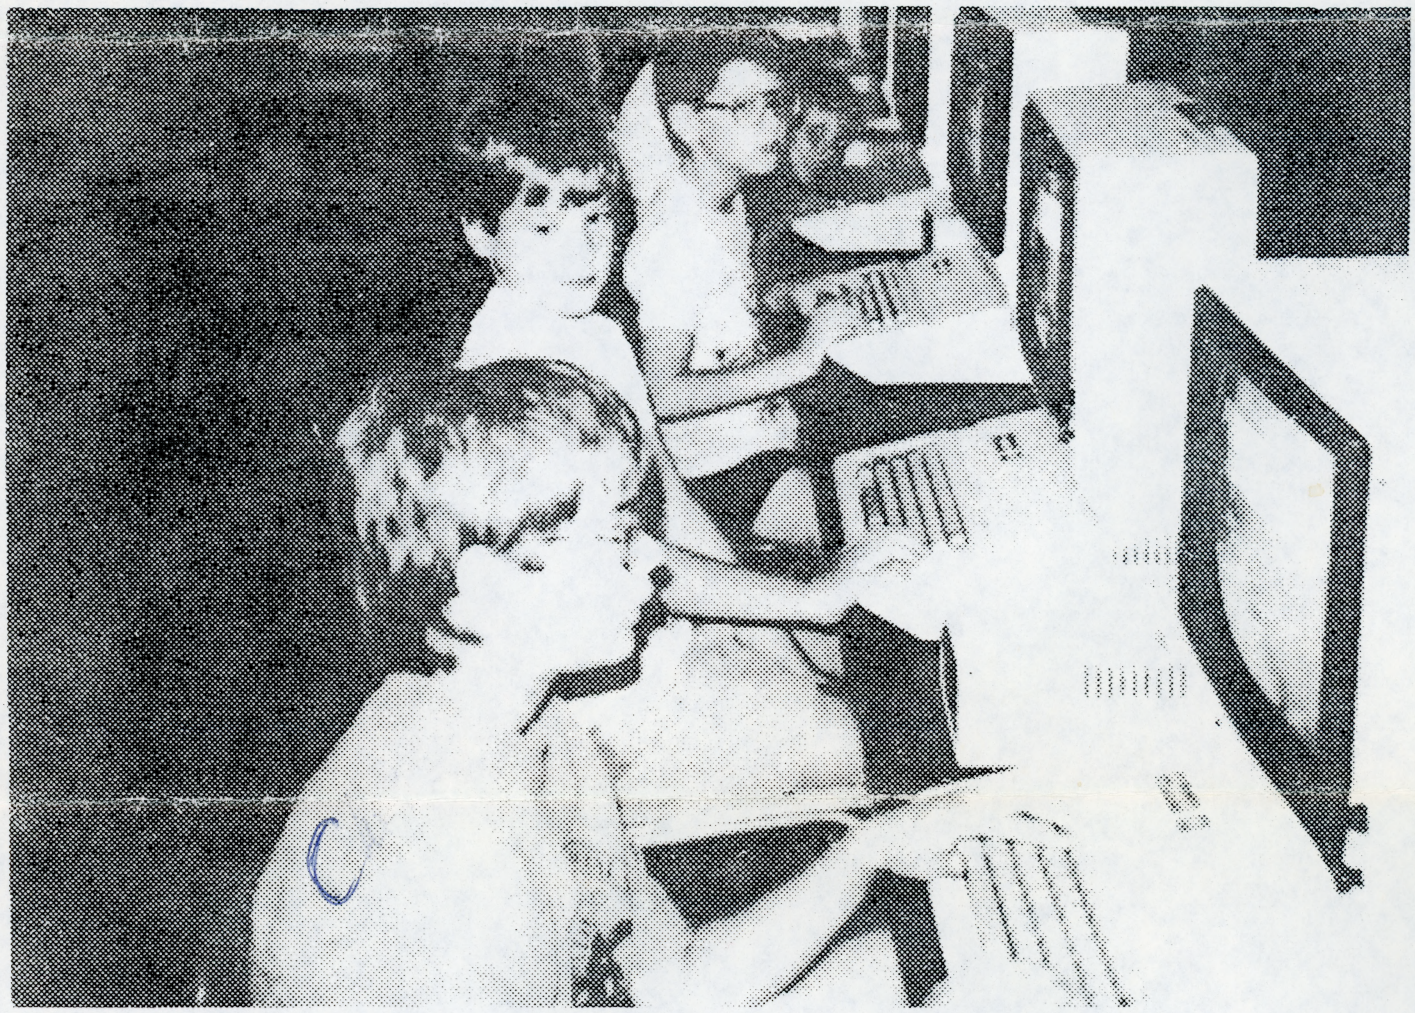
A PUBLICATION OF THE AUDUBON BOARD OF EDUCATION

SEPTEMBER, 1988



Students in the Summer Computer Camp spent two days "traveling west" on the Oregon Trail, making computer decisions for progress and survival. Seated from bottom to top are Chris Emerle, Michael Loeffler, Chris Bee, Tavis Rendell and Winnie Wolenter with Mrs. Trione, the instructor. Along with the tour to Oregon, the classes learned introductory programming in BASIC and LOGO. Word processing included letters from camp and the class also worked with databases.
